Student Checklist for Power-to-X Facility Visit

Before the Visit

	Review basic concepts: renewable energy, electricity grids, electrolysis, and hydrogen production. Understand the importance of balancing electricity supply and demand.						
	Famili	miliarize yourself with PEM (Proton Exchange Membrane) electrolysis technology.					
	Prepai	re 2-3 relevant questions to ask during the visit:					
During	the Vi	sit					
	Active	ly listen to explanations by the instructor, tour guide, and operations manager.					
	Take s	tructured notes on:					
	0	Grid balance and fluctuation of wind energy:					
	0	Process of water electrolysis and hydrogen storage:					

	0	Specific features and advantages of PEM electrolysis:
	0	Safety and operational aspects of Power-to-X systems:
	Partici	pate in visual inspection and connect observations to theoretical knowledge.
	Ask pr	epared questions and any new questions that arise during the tour.
After t	he Visit	
	Summ	arize key learnings in a short report or learning journal.
		t on how Power-to-X technologies contribute to renewable energy storage and grid stability. y any areas where further study or clarification is needed.

Co-funded by the European Union

The T-shore project is funded through the the Erasmus+ Centres of Vocational Excellence (CoVEs) call 2021

Acknowledgements

We would like to extend our sincere thanks to all the project partners for their invaluable contributions to this report and their dedicated work on the T-shore project.

Our deepest appreciation also goes to all T-shore stakeholders, particularly the members of the regional Centres of Vocational Excellence (CoVEs), whose ongoing efforts are instrumental in driving the success of this initiative.
